***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-44, drawn to a method for detection, identification and/or quantification of one or more target molecules, classified in class 435, subclass 4.
  - II. Claims 45-69, drawn to a disc; claims 70-72, drawn to a method of making a disc; claims 73 and 86, drawn to a kit comprising said disc; claims 74-80 and 85, drawn to a detection and/or reading device comprising said disc; and claims 81-84, drawn to a handling device comprising said disc, classified in class 435, subclass 287.2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the device of Group II can be used in a materially different process such as inventory control where material is printed on the disc in such a manner that it is read and correlated with a given product in an inventory.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. In the event that applicant elects the invention of Group I, the following election of species is required.

Art Unit: 1634

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. Target molecule is a nucleotide sequence (claim 9);
- b. Target molecule is antibody or antigen (claim 10);
- c. Target molecule is ligand /receptor (claim 11); and
- d. Target molecule is an enzyme (claim 14).

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-8, 12, 13, and 15-44 are generic.

7. In the event that applicant elects the invention of Group II, the following election of species is required.

8. This application contains claims directed to the following patentably distinct species of the claimed invention: nucleotide sequences, antigens, antibodies, receptors, ligands of receptors, receptor and enzyme peptides, lipids, saccharides, haptens, fluorophores, chromophores, catalysts, and new macromolecules obtained by combinatorial chemistry, or a combination thereof.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 46-80 and 82-86 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 1634

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. A telephone call was made to Daniel E. Altman, Reg. No. 34,115, on 21 July 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley L. Sisson whose telephone number is (703) 308-3978. The examiner can normally be reached on 6:30 a.m. to 5 p.m., Monday through Thursday.

Art Unit: 1634

12. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached on (703) 308-1119. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 872-9307 for After Final communications.

13. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
